

Naveen Bejjam

📞 7032388991 ✉ naveebejjam1707@gmail.com  LinkedIn  Portfolio

Software Developer with around 4 years of experience in React.js and frontend development. Skilled in building intuitive, responsive web applications, writing clean code, and delivering scalable solutions. Strong in Agile workflows, problem-solving, and collaboration.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, JavaScript Event Loop
- **Frontend:** React.js, Next.js, HTML5, CSS3, DOM Manipulation, Responsive Design, Cross-Browser Compatibility, REST API Integration, GraphQL, Redux, Redux Toolkit, Context API, React Router, React Hooks, WebSockets, Electron.js.
- **Mobile Development:** React Native (Expo), React Navigation, Responsive Layouts, Platform APIs
- **Frontend Architecture:** Microfrontends, Module Federation, Webpack, Design Systems
- **Backend & APIs:** Django, RESTful API Development, Data Structures and Algorithms
- **Cloud & DevOps:** AWS (S3, CloudFront, CloudWatch), Jenkins, CI/CD, Azure
- **Testing:** Jest, React Testing Library
- **Performance & Optimization:** Performance Optimization, Code Splitting, Lazy Loading, Virtualization, Memoization
- **Tools:** Git, GitHub, npm, JIRA, Chrome DevTools, Browser Debugging
- **Methodologies:** Agile/Scrum, Object-Oriented Programming (OOP), Responsive UI/UX, Accessibility (a11y)

EXPERIENCE

Augmento Labs (A SAKSOFT Company) | Software Engineer

November, 2025 – Present

- Developing a greenfield application using micro-frontend architecture with Webpack Module Federation to build a scalable and modular foundation.
- Stabilizing the platform by fixing critical bugs, building new features, and collaborating with a US-based client to deliver reliable, business-aligned solutions.

Head Digital Works Pvt Ltd | Software Development Engineer 2

July, 2022 – Sept, 2025

- Built and delivered high-performance gaming applications (POKER and CALL BREAK) using React.js, Electron.js, JavaScript, HTML, and CSS, driving smooth and scalable gameplay.
- Owned end-to-end delivery of critical user modules (wallet, add cash, profile, offers) by integrating Juspay for secure payments and HyperVerge for KYC, improving transaction efficiency and onboarding experience.
- Implemented Redux for state management and optimized performance with lazy loading, code splitting, and efficient data structures/algorithms, improving load times and rendering speed and enhanced the user experience.
- Built smooth UI animations with CSS transitions and keyframes to improve interactivity and visual appeal.
- Played a key role in delivering a robust poker desktop app, directly contributing to the 30% uplift in the poker revenue.
- Strengthened application reliability by writing unit and integration tests with Jest, increasing code coverage to 60%.
- Configured version control checks and automated hot reload on app launch. Automated deployments via Jenkins CI/CD, ensuring smooth and error-free releases.
- Actively contributed to Agile ceremonies, peer code reviews, and mentored new joiners.

Loyalty Juggernaut Inc. | Product Engineer

Jan, 2022 – July, 2022

- Debugged and stabilized Python applications by identifying root causes and resolving critical issues, significantly improving system reliability.
- Built scalable Django REST APIs with AWS integration, authored Confluence design docs, created unit tests, and collaborated across teams to accelerate high-quality delivery.

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT), Hyderabad, Telangana

June, 2022

B.E. Computer Science Engineering

CGPA: 8.2/10

ACHIEVEMENTS & AWARDS

Super Ace – Extra Mile Champ – Awarded for delivering the Callbreak game successfully by quickly adapting to new domains and technologies.

Super Ace – Innovative Brains – Recognized for leading the launch of Callbreak on tablets with innovative problem-solving.

Super Ace – Learning Yoda – Honored as Star Performer for mastering new technologies rapidly, mentoring peers, and fostering a culture of continuous learning.
